FULL STACK DEVELOPER / ANDROID DEVELOPER

I'm a passionate **BCA student and web developer** with hands on experience in **frontend development, UI/UX design, and API integrations**. I enjoy turning ideas into functional, user-friendly web solutions.

Currently, I am developing **"Civic Eye,"** an Android application built with **Kotlin**. This platform empowers community members to report and track local issues, streamlining communication between citizens and authorities. This project reflects my deep interest in how **AI and mobile automation** can make technology more accessible and impactful for everyday users.

I actively participate in the **National Cadet Corps (NCC)**, which has strengthened my leadership and teamwork abilities.

Currently, I'm seeking opportunities to **learn, build, and contribute** to innovative teams in **web development, AI applications, and digital product design**.
